1. Introduction: Beamer

2. Metropolis Theme

3. UGE Theme

4. Conclusion

5. title

The Title page is printed using the command:

```
\maketitle
```

The element printed on this page are defined in the preamble by

```
\title{Univ-Eiffel Template}  
\subtitle{A modern beamer theme based}  
\date{\today}  
\author[romain.noel@univ-eiffel.fr]{Romain NOËL}  
\institute{Universtity Gustave Eiffel}  
\titlegraphic{\hfill\includegraphics[height=1.5cm, draft]{Title_logo.pdf}}  
\logo{\includegraphics[height=1.5cm, draft]{logo.pdf}}
```

The usual page is printed and defined using the command:

```
begin{frame}  
\frametitle{Title on top of the frame}  
contenu...  
end{frame}
```

Note that the logo printed on this page are defined in the preamble by

```
\logo{\includegraphics[height=1.5cm, draft]{logo.pdf}}
```

Sections group slides of the same topic

```
\section{Elements}
```

The theme provides sensible defaults to  
`\emph{emphasize}` text, `\alert{accent}` parts  
or show `\textbf{bold}` results.

becomes

The theme provides sensible defaults to emphasize text, **accent** parts or show **bold** results.

- Regular
- *Italic*
- SMALL CAPS
- **Bold**
- ***Bold Italic***
- **Small Caps**
- Monospace
- *Monospace Italic*
- Monospace Bold
- *Monospace Bold Italic*

## Items

- Milk
- Eggs
- Potatoes

## Enumerations

1. First,
2. Second and
3. Last.

## Descriptions

**PowerPoint** Meeh.  
**Beamer** Yeeeha.

Then something below the columns, that be long enough to recover all the line-width.

2.2 Elements

3. UGE Theme

4. Conclusion

5. title

The Metropolis theme is a Beamer theme with minimal visual noise inspired by the HSRM Beamer Theme by Benjamin Weiss.

Enable the theme by loading

```
\documentclass{beamer}  
\usetheme{metropolis}
```

Note, that you have to have Mozilla's Fira Sans font and XeTeX installed to enjoy this wonderful typography.

Sections group slides of the same topic

```
\section{Elements}
```

for which Metropolis provides a nice progress indicator ...

# Metropolis Theme

---

Title formats

Metropolis supports 4 different title formats:

- Regular
- SMALL CAPS
- ALL SMALL CAPS
- ALL CAPS

They can either be set at once for every title type or individually.

This frame uses the `smallcaps` title format.

## Potential Problems

Be aware that not every font supports small caps. If for example you typeset your presentation with pdfTeX and the Computer Modern Sans Serif font, every text in small caps will be typeset with the Computer Modern Serif font instead.

This frame uses the `allsmallcaps` title format.

## Potential problems

As this title format also uses small caps you face the same problems as with the `smallcaps` title format. Additionally this format can cause some other problems. Please refer to the documentation if you consider using it.

As a rule of thumb: just use it for plaintext-only titles.

This frame uses the `allcaps` title format.

## Potential Problems

This title format is not as problematic as the `allsmallcaps` format, but basically suffers from the same deficiencies. So please have a look at the documentation if you want to use it.

# Metropolis Theme

---

## Elements

Three different block environments are pre-defined and may be styled with an optional background color.

## Default

Block content.

Figure 4: A nice sinus plot with Tikz.

Figure 5: A nice bar chart with Tikz.

Metropolis defines a custom beamer template to add a text to the footer. It can be set via

```
\setbeamertemplate{frame footer}{My custom footer}
```

The final slide has a new option style with command:

```
\begin{frame}[standout]  
\frametitle{Thank You !}  
Questions ?  
\end{frame}
```

Voilà

Thank You !

Questions?

Sometimes, it is useful to add slides at the end of your presentation to refer to during audience questions.

The best way to do this is to include the `appendixnumberbeamer` package in your preamble and call `\appendix` before your backup slides.

**Univ-Eiffel Theme** will automatically turn off slide numbering and progress bars for slides in the appendix.

As the following command indicates, it is possible to include pictures under a section title:

```
\sectionpic{BeamerExtra}{\PathS0/Logos/logo-eps-converted-to.pdf}
```

Thanks to Beamer, you can create buttons to just to hidden slides that are in the appendices

```
\begin{frame}[label=<originalSlide>, noframenu numbering]  
\hyperlink{<hiddenSlide>}{\beamerbutton{NameOfButton}}
```

Don't forget to create a button to come back also!

For example : 

This slide will always be printed with

```
\begin{frame}<handout:1|beamer:1>or \begin{frame}<all:0>
```

while the following code will never appears

```
\begin{frame}<handout:0|beamer:0>or \begin{frame}<all:0>
```

This frame will appear with

```
\documentclass[aspectratio=169, 10pt]{beamer}  
\begin{frame}<handout:0|beamer:1>
```

BUT the following will not appear

```
\documentclass[aspectratio=169, 10pt]{beamer} % requires handout to appear  
\begin{frame}<handout:1|beamer:0>
```

contenu...

The interactions between ntheorem and beamer has been solved.

**Theorem 1.** *contenu...*

*Proof.* *contenu...*

Here is an example of acronym using glossaries: Lattice BOLTZMANN Method (LBM)

And an example of equation in colors, the Boltzmann equation:

$$\partial_t f(x, \xi, t) + \xi \cdot \partial_x f(x, \xi, t) + g \cdot \partial_\xi f(x, \xi, t) = \Omega(f, f) \quad (2)$$

where  $f$  is a variable defined through glossaries.

Some text that requires a reference **knuth92**. Using the command<sup>a</sup>

```
\footfullciteBeamer{<bibKey>}
```

The command to cite in text mode is also possible with

```
\fullciteBeamer{<bibKey>}
```

and giving **ConcreteMath**

---

<sup>a</sup>Please note that this command can be used slide-by-slide the command footnote.

The last but not least feature present is a macro simplifying the way to include videos in beamer presentation.

It requires to define the OS on which the pdf will be red, thanks to the command

Then, the video can be included with the command
